

CleanFuelsOhio

Our mission is to improve air quality and health, reduce environmental pollution, strengthen Ohio's economy, and enhance our nation's energy security

Established in 2002, Clean Fuels Ohio is a non-profit organization that is dedicated to making Ohio a cleaner, healthier and more prosperous state. In addition to partnering with organizations to implement advanced fuel solutions and vehicle technologies, we are helping to build a statewide fueling and charging infrastructure that supports these efforts. We also collaborate with partners in the transportation industry and local, state and federal government to promote the use of cleaner fuels and vehicle technologies and to reduce barriers in order to create and maintain a level playing field for our members and stakeholders.

WHAT WE OFFER

Unbiased Advice

Unlike other organizations of our kind in Ohio, we are fuel neutral. That means we do not promote a specific advanced fuel or vehicle technology. Instead, we are advocates of any advanced fuel and vehicle technology that reduces pollution and helps your organization achieve superior results.

Cost-Effective Consulting Fees & Flexible Services

As a non-profit organization, our consulting fees are far less expensive than other consulting firms which can add to significant savings on your clean transportation initiative. In addition, we'll look for funding opportunities to help defray your out-of-pocket costs. Our services are also flexible, so regardless of the size and scope of your project, we'll help put the best solution in place for you.

"Clean Fuels Ohio has demonstrated exemplary leadership in their big tent approach to facilitating market growth of advanced transportation technologies and clean fuels. Their success can be measured in countless ways, not the least of which is the deserved esteem they command on a national stage. Not only is their sphere of influence recognized broadly but so is their efficacy in pushing for policy change, collaborating with partners, and demonstrated success in growing the industry in Ohio and beyond."

The Trusted Advisor & Collective Voice of Ohio's Clean Transportation Industry

In-Depth Experience & a Track Record of Success

Our team has more than 40 years of combined experience in the clean transportation industry which includes implementing hundreds of successful programs for clients and members who rely on our expertise in advanced fuels, vehicle technologies and advanced mobility solutions.

U.S. Department of Energy Clean Cities Coalition

We are Ohio's only U.S. Department of Energy Clean Cities coalition. As a result, we are committed to providing unbiased, objective resources and information to help you evaluate your options. Our recommendations are based on a comprehensive analysis of your current situation and goals and will leverage the comprehensive resources of the U.S. Department of Energy as well as the expertise of nearly 100 coalitions across the country should you need a multi-state or national solution.

U. S. Department of Energy

Clean Cities coalitions support the nation's energy and economic security by building partnerships to advance affordable domestic transportation fuels, energy efficient mobility systems, and other fuel saving technologies and practices.

Policy Efforts

We are the only organization of our kind in Ohio that works with local, state and federal policymakers on behalf of members and stakeholders on industry-related issues and opportunities. Our efforts are designed to provide a united voice for the industry to promote the use of cleaner fuels and vehicle technologies and reduce barriers in order to create and maintain a level playing field.
