

LONESTAR SV | ELECTRIC

1902 St Michael Dr | Texarkana, TX | 75503 | 903-306-0801

Company Profile

Lonestar Specialty Vehicles, headquartered in Texarkana, Texas, is a leading supplier of fully electric and diesel powered remanufactured commercial vehicles. Remanufacturing extends the useful life of an existing asset and provides a significant reduction in a company's carbon footprint. Lonestar SV is at the forefront of innovative remanufactured commercial vehicle solutions that offer exceptional performance, price, efficiency and reliability. With more than 3,000 assembled Class 8 trucks and tractors commercially deployed, Lonestar SV delivers proven vehicle solutions for every application.

Mission

Our mission is to provide practical commercial vehicle solutions that are hassle-free and value-added, for every customer, every time.

Objectives

- Increase up time
- Reduce complexity
- Reduce cost
- Build lasting relationships

Electric Terminal Tractor

Lonestar SV embarked on a mission in 2019 to provide a solution to internal combustion terminal tractors. Observing the amount of downtime customers were encountering with Tier 4 emissions equipment, a solution had to be provided. This was the driving force behind the development of the Lonestar SV Reman line of electric terminal tractors. Lonestar SV deployed the first electric T22 November 25, 2019.
